PERSONAL PROFILE

Front-End Engineer specializing in building scalable, high-performance web applications with an emphasis on clean design, accessibility, and seamless user experiences. Highly skilled in JavaScript, React, Next.js, and modern UI frameworks, with a proven ability to transform complex requirements into elegant, user-friendly solutions. Experienced in leading cross-functional teams to accelerate feature delivery by 20%, and in developing robust design systems that ensure consistency, efficiency, and long-term scalability across multiple projects.

Passionate about crafting intuitive digital products that bridge business goals with user needs, and committed to delivering solutions that not only perform flawlessly but also delight users and drive measurable impact.

• EXPERIENCE

SavoryNest (Restaurant Website) – Frontend Developer
htttps://savorynested.netlify.app

August 2025

Frontend Stack: HTML, CSS, SAAS, Javascript.

- Designed and developed a responsive, modern restaurant website showcasing menu, chef profile, customer testimonials, FAQs, and table reservation

- Implemented clear navigation and strong branding / storytelling to highlight the restaurant's identity and engage visitors.

  Built interactive features such as reservation booking, menu highlights with ratings, and testimonial section to improve user engagement.

  Optimized performance with image optimization, clean code structure, and responsive design principles to ensure faster loading time.
- Focused on UI/UX consistency, accessibility (WCAG standards), and mobile-friendly layouts for seamless browsing across devices.
- Build system-choice theme (dark and light theme) and also icon for toggling user-choicetheme

Saaskit (Task & productivity web App) – Frontend Engineer

https://sasskit.netlify.app

July 2025

Frontend Stack: HTML, CSS, Javascript.

- Created a productivity app website offering task tracking, goal setting, team collaboration, and smart reminders.
- Designed features such as Integrations, secure data encryption, and an intuitive interface to enhance usability and trust.
- Includes FAQ, pricing options, and 'Get Access / Free' calls-to-action to guide user onboarding.

Noteflow (Ai-Powered-Note-Taking App) – Frontend Engineer

https://notefloww.netlify.app/

June 2025

Frontend Stack: HTML, CSS, Javascript.

- • Developed a responsive web app for smart note-taking: summarization, organization, tagging, reminders and voice-to-text features powered by AI.

  Designed clean UX/UI with clear sections like Features, Pricing, FAQ, Community and Testimonials to build trust and usability.

  Incorporated collaboration tools (team sharing, commentary) and multi-device sync to enhance productivity.

IndoorPlant (Plant Selling Website) – Frontend Engineer

https://indoorplante.netlify.app/

September 2025

Frontend Stack: HTML, CSS(Tailwind), Javascript.

- • Built and deployed a marketing/product landing site for an indoor-plants shop
- • Implemented hero CTAs and promotional banner, product showcase (product name + price cards), and a testimonials section.
- • Recommended improvements: image optimization, meta tags for SEO, accessibility checks and purging unused Tailwind CSS for performance.
- • Created newsletter subscription UI and footer with contact information; organized content into semantic sections for SEO.

Paulo Construct (construction Service website) – Frontend Engineer

htttps://pauloconstruct.netlify.app

March 2025

Frontend Stack: HTML, CSS, Javascript.

Built a responsive construction company website featuring Home, About, Services, Projects, contacts sections.

Showcases completed projects with imagery, and highlights key services like home construction, repair & maintenance, and installations.

- Highlighted credibility through project stats, client outreach, and service details.
- Built a scroll reveal animation as user scroll on each section

GERICHT (Restaurant Website) – Junior Frontend Engineer
htttps://gerichth.netlify.app

February 2025

Frontend Stack: HTML, CSS, Javascript.

- Developed a modern restaurant website featuring menu highlights, gallery, awards and contact details.
- Implemented clear navigation and engaging UI/UX to showcase fine dining experience.
- Included a subscription feature (newsletter) to keep visitors updated with latest offers, promoting customer retention / marketing.
- Ensure the site has strong structural hierarchy: prominent headings, CTAs like 'Book Table', 'Explore', 'Know More' etc. so user can navigate easily.

Unique Coffee (Coffee website) – Junior Frontend Engineer

August 2024

Frontend Stack: HTML, CSS, Javascript.

- Developed and maintained scalable, high-performance web applications serving any users.
- Built and maintained a design system adopted across multiple projects, improving efficiency and brand consistency.

- Built a scroll reveal animation while scrolling on each section. • Optimized application performance, reducing load time by 10%.
